DETAILED ACTION

Double Patenting

The Double Patenting made in the last office action dated 08/11/2004, is hereby withdrawn due to a Terminal Disclaimer being filed.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Albert Smith (Reg. 20355) on 05/07/2008.

Claim 20 is amended to read:

20. (Currently Amended) A computer program encoded on a computer-readable medium ~~computer implemented program~~ for extracting at least one contour of a target object from images obtained by an image pickup of the target object by cameras, the program controlling the functions comprising:

a node locator locating a plurality of nodes on a periphery of a region, which includes the target object, within the image;

a contour deformation unit deforming the contour, which is formed by connecting nodes at a predetermined connection order, by shifting the position of each node to the position where the predefined energy function becomes minimum;

an internode distance calculator measuring internode distances about all combination of nodes constituting the contour excepting the internode distance between adjacent nodes; and

a connection creator creating a connection line to divide the contour when a combination of nodes whose internode distance is below a first threshold value exists, wherein

the connection line connects one of nodes in the combination with the node adjacent to the other node in the combination,

the node adjacent to the other node is the node being positioning upstream or downstream in the predetermined connection order with respect to the other node, and

the first threshold value is determined in accordance with the distance to the target object.

Reason for Allowance

1. The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method, apparatus, and computer-readable medium for contour extraction and contour division. The closest prior art the examiner found was by Kimmel, U.S. Patent 6,031,935, which fails to address the following limitation:

"a contour deformation unit deforming the contour, which is formed by connecting nodes at a predetermined connection order, by shifting the position of each node to the position where a predefined energy function becomes minimum; a

connection creator creating a connection line to divide the contour when a combination of nodes whose internode distance is below a first threshold value exists."

1. Claims 1, 12-20 (now renumbered 1-10 for issue) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Vanchy Jr. whose telephone number is (571) 270-1193. The examiner can normally be reached on Monday - Friday 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samir Ahmed can be reached on (571) 272-7413. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
